

Due to the potential health hazards associated with the use of MPTP (1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine), the USC Institutional Biosafety Committee (IBC) requires a medical evaluation prior to the use of MPTP.

To that end, the USC Office of Environmental, Health and Safety (EH&S) Occupational Medicine Program for Biomedical Research is coordinating a medical evaluation at no cost to the employee. The individual listed below is authorized for a neurological exam in the Keck Neurology Clinics, if participation in the MPTP Medical Evaluation is selected.

Instructions for Obtaining Appointment:

Please contact the Neurology Clinic for your appointment at the following number: 323-442-5710.

The Neurology Department is located at Health Care Center II (HC2), third floor. Please bring this authorization form with you to your appointment.
